Do you want smoke to choke your heart?

Source : web

A few years back, an advertisement widely released in one of the most populous countries of the world showed a young man smoking a popular and cheap cigarette, with a catchy title- 'Live life young!Smoke C-----R!'

It did not take a long for the harsh truth to sink in- you do not get a chance to get old on that cigarette, you die young. In the West, another immensely popular ad featured the Marlboro Man- macho, muscled and majestically mounted on a Mustang, a quintessential free-roaming horse of the American wild west, riding into the sunset. But many of the models who played the Marlboro man, who enjoyed the perk of abundant free cigarettes, did not live to see the evening of their life. They died young on the trail of life

A recent report in The Lancet, one of the most reputed medical journals in the world, reported worrying findings.

Source : web

In 2015, smoking caused more than one in ten deaths worldwide, killing more than 6 million people with a global loss of nearly 150 million disability-adjusted life-years.

How does smoking cause heart disease? The facts are un-

equivocally established.

Smoking damages the lining of your coronary arteries, leading to a build-up of fatty material (atheroma) which narrows the artery. This can cause angina (chest pain) and eventually a heart attack. The carbon monoxide in tobacco smoke reduces the amount of oxygen in your blood. This means your heart has to pump harder to supply the body with the oxygen it needs.

The nicotine in cigarettes stimulates your body to produce adrenaline, which makes your heart beat faster and raises your blood pressure, making your heart work harder.

Your blood is more likely to clot, which increases your risk of having a heart attack.

Smokers are almost twice as likely to have a heart attack compared with people who have never smoked.

When non-smokers breathe in second-hand smoke - also known as passive smoking - it can be harmful. Research shows that exposure to second hand tobacco smoke is a cause of heart disease in non-smokers, which means you could be harming the health of your children, partner and friends.

Stopping smoking has huge benefits and it's never too late to give up.

Stopping smoking is the single best thing you can do for your heart health, and the good news is that the risk to your heart health decreases significantly soon after you stop.

Quit smoking, live to a long, happy and healthy age!

National Department of Health
Office of the Secretary of Health
PRESS RELEASE

PRESS RELEASE ON WORLD NO TOBACCO DAY

THEME: **Tobacco-A Threat to Development**

Each year, on the 31st of May, Papua New Guinea joins the World Health Organisation to promote World Tobacco Day. This year the theme is "Tobacco – A Threat to Development".

This theme has been chosen to highlight the link between tobacco use and the damaging affect it has on sustainable development. All countries are encouraged to ensure that strong and effective tobacco control measures are implemented as a part of their Sustainable Development Agenda.

Tobacco use is a major health risk, and its use around the world leads to Tobacco related diseases including cancers, heart disease, chronic respiratory illness, diabetes, stroke in adults. Indirect health impacts include asphyxia (breathing difficulties) in new born babies and low birth weights, making the child vulnerable to other diseases.

The result of these diseases, apart from the personal misery experienced by those affected, are the high health care costs and premature death which impact the community. It is estimated that 80% of premature deaths attributed to tobacco use occur in low to middle income countries. This relates directly to Papua New Guinea.

The use of tobacco products, particularly cigarette smoking, has increased many times in PNG over the last 20 years and we are now ranked as the highest user of tobacco products in the Western Pacific Region. According to the Global Youth Tobacco survey conducted in PNG in 2016, 53% of young people (aged 13-15) are regularly smoking. This rate is likely to be higher than reported with the increasing availability of counterfeit cigarettes and illicit tobacco.

Sadly, it is our poorest people who are hardest hit by

this tobacco use. It is estimated that some families spend up to a quarter of their household food expenditure on tobacco products. We also know adults who cannot read are more likely to be smokers.

It is essential to the Government that this

damage to the health of our people and our development is halted. It is for this reason that the National Department of Health supported the Governments objective by developing the new Tobacco Control Act, which was passed into law in 2016. This act replaces the previous Act which was over 30 years old.

The purpose of the Act is to place controls on the sale, use and promotion of tobacco products and to use the mechanisms open to Government, and through new regulations to be released in 2017, to significantly reduce the harmful use of the tobacco products.

On behalf of the National Department of Health, I invite all sectors of the PNG community, and of the community itself, to help enforce the controls on tobacco use. I ask everyone to use No Tobacco Day to reflect on what they can do personally and professionally to reduce the use of tobacco products in their own part of the Country.

A reduction in the use of tobacco products will reduce the adverse health effects, improve the economic development of our Country and will promote overall health and wellbeing. These changes will support our achievement of Vision 2050, a smart, wise, fair and happy society.

Bilong wanem na PNG i nidim wanpela nupela kebol aninit long solwara

Planti ogenaisesen i bin toktok planti long planti yia, long givim wanpela nupela kebol i go long Papua Niugini (PNG). Ating i no gat wanpela samting i kamap tru long mekim dispela samting long bihainim tingting bilong ol. Olsem na dispela hap toktok i kamap olsem, 'hot air' o "tok win nating" i save kam long tingting hariap tru, olsem wanpela wei bilong stori long dispela kain toktok i kami nap nau. Tasol maski ol dispela 'tok win nating', ol tok tru, bilong wanpela nupela telekomyunikesen kebol aninit long solwara em yumi no inap long tok no gat.

Wantaim tingting bilong soim piksa bilong ol dispela tok tru, wanpela 'piksa i ken kaunim wan tausen toktok' olsem ol i save tok, na Piksa 1 hia em i gutpela eksampel bilong pawa we piksa i save karim.

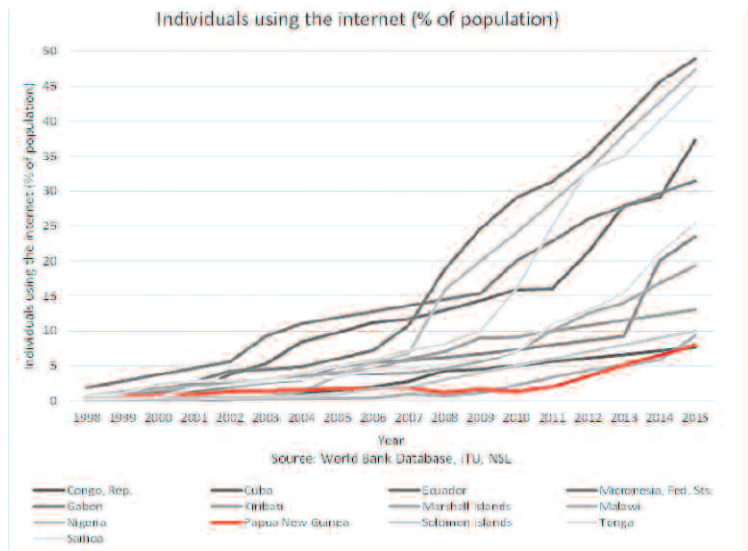

Figure 1
PNG em i stap long retpela lain long Piksa 1, na em i wanpela taim siris bilong yusim intanet, olsem wanpela presentis, o wanpela hap bilong populesen, skelim wantaim ol narapela kantri long wankain mak.

Lukim klostu wei we PNG planti taim i save kam klostu long mak daunbilo inap planti yia, na long 2015 em i stap long las mak tru long olgeta kantri we i stap long lista. Wanpela bikpela as bilong dispela kain samting i kamap, namel long ol narapela sampela, em bikos kebol nau i stap aninit long solwara we i konek long PNG em i no inap long karim hevi bilong ol data PNG i nidim na long liklik prais. Taim ol prais bilong data i wok long pundaun long wol, bikos long planti tumas i stap, long PNG em i oposit, bikos saplai bilong data em i liklik tru olsem na em i mekim prais bilong data i go antap tru we planti pipel na kampani long PNG i painim hat long baim inap. Long narapela we bai yumi tok, olsem bikos PNG i no inap long kisim bikpela data wantaim liklik prais, dispela i wok long mekim kain piksa olsem i stap long Piksa 1 antap i kamap.
